(54) Title: A METHOD AND DEVICE FOR ADVANCING ESSENTIALLY RECTANGULAR PIECES OF CLOTH TO A FEEDER

(57) Abstract: The present invention relates to a method and a device for advancing essentially rectangular pieces of cloth (5) to a feeder (60) comprising securing of a piece of cloth in securing means (31) that are configured on a rail conveyor (30); wherein the rail conveyor with the piece of cloth is transported in a direction of conveyance (16) on an endless conveyor rail; and wherein the rail converter with the piece of cloth is transferred to the feeder (60). Hereby reduced operator time is accomplished, while simultaneously an increase in capacity is achieved compared to the prior art advancement devices.
